

README

The program is a data visualization web page built on **Dash** and **Pandas**.

In order to run the program, you need to finish the following steps.

1. Install python and add it to the system path.
2. Install Dash and Pandas.
3. Open the terminal and change the current directory to the program folder.
4. run "python dataVisualization.py"

Note: please make sure that **BlackFriday.csv** is under the same folder of **dataVisualization.py** to make sure the program works properly.
